Making a difference in a child's life . . .

The Greenhouse Project

Learn & Earn

The computer lab, with its four stations in place, is now being used to aid the orphans in their academics and teach English as a second language. With the kitchen complete, our focus turns to the Greenhouse Project.

Pastor Leonid informs us that there is a viable market for fresh herbs and vegetables to be sold all year round. The severe winter climate yields minimal vegetation but with this structure in place, the orphanage will have the ability to grow produce all year long and sell what they grow at the local marketplace. This will provide them with a means of support while teaching the children the horticulture trade. A great opportunity both to *earn* and to *learn*.

Thanks to Aaron Murphy of ADM Architecture, who graciously donated his time, the initial design of this project is complete. Our next step is to focus on the construction phase, securing the necessary funds for materials and supplies. Please keep us in your prayers as we move forward with this large undertaking.
